**反面 1:3 真实放大**  
让细节妆容更精致

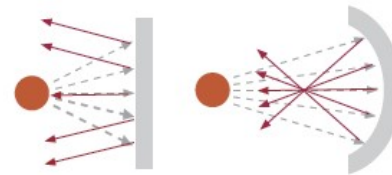

采用真实放大的光学原理，放大同时不失真，  
聚焦解决你的局部瑕疵敢于放大面子，才有权追求完美

**正面 1:1 平面高清**  
高清视界

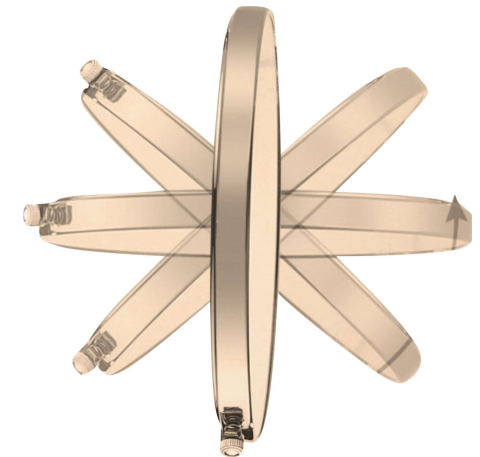

现代铸镜技术，大部分使用玻璃铝合金，  
石英石侧面加升级铸镜技术，多层优质电镀

## The Power of Reflection

Mirrors And How They Magnify Reflection: Images are reflections off glass. The silver nitrate coating reflects visible light radiation. Concave Magnification: 3x magnification is the most serviceable – the higher the magnification the higher the distortion. The curvature of the lens determines the degree of magnification The more the curvature, the higher the magnification and distortion As the diameter of the lens increases, the distortion increases as well

双面 360° 自由旋转
