Wall-Mounted Makeup Mirror

Single-sided | Hardwired | Original mounting illustrations preserved

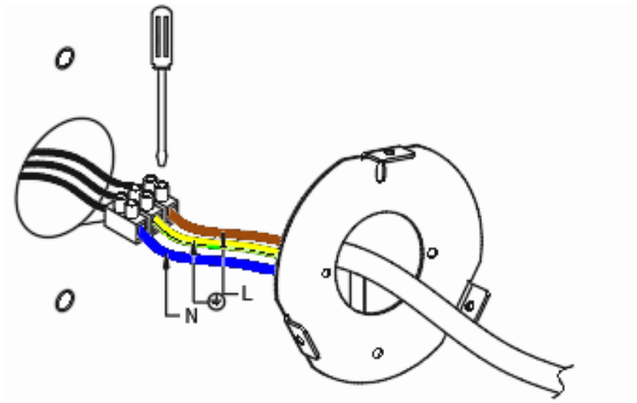

01 Prepare the mounting holes

Mark 90 mm spacing and drill the two marked holes.

Insert suitable expansion anchors.

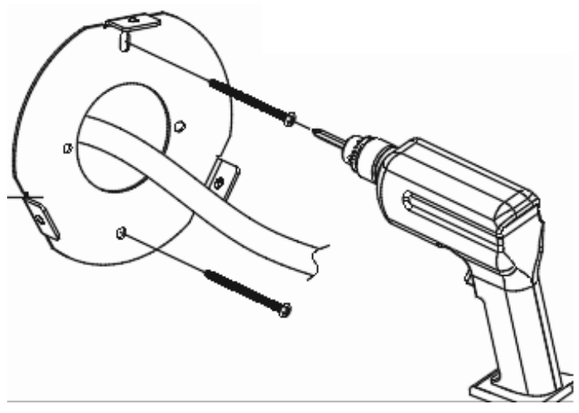

02 Connect the supply wires

Isolate power and connect the supply wires to the terminal.

Follow the L, N and earth marks in the source drawing.

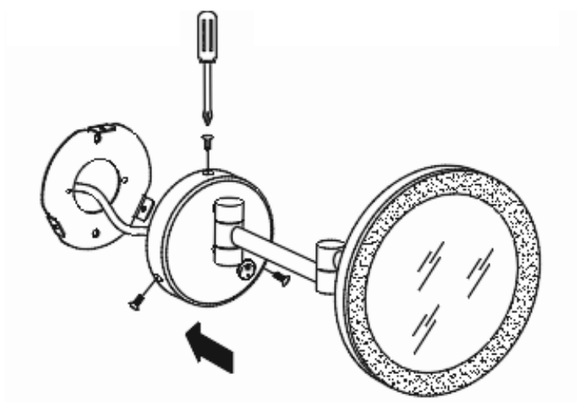

03 Secure the wall chassis

Fix the wall chassis with suitable screws.

Make sure the chassis is firmly secured to the wall.

04 Attach the single-sided mirror

Fit the mirror assembly onto the wall chassis.

Tighten the retaining nut and check the mounting.

INSTALLATION NOTES | REVIEW COPY - NOT A DRILLING TEMPLATE

The source drawings, including the 90 mm mounting reference and wiring labels, were retained without redrawing product parts.
Confirm dimensions, fasteners, electrical ratings and wall conditions against the approved product drawing. Qualified electricians only.
