Wall-Mounted Makeup Mirror

Hardwired installation - mounting plate with retaining nut

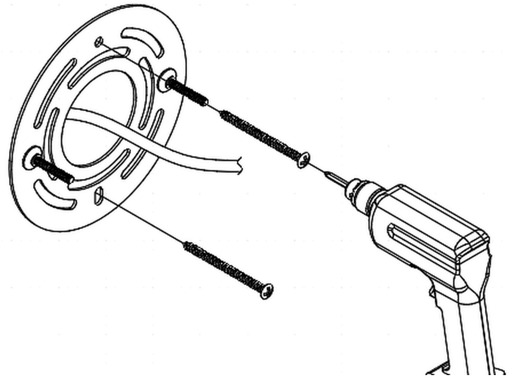

01 Prepare the mounting holes

Mark the mounting points using the supplied plate.

Drill suitable holes and provide an opening for the cable.

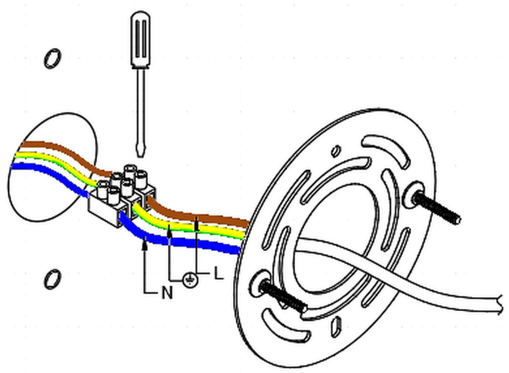

02 Secure the mounting plate

Use wall anchors and screws suited to the wall structure.

Pass the power cable through the mounting plate.

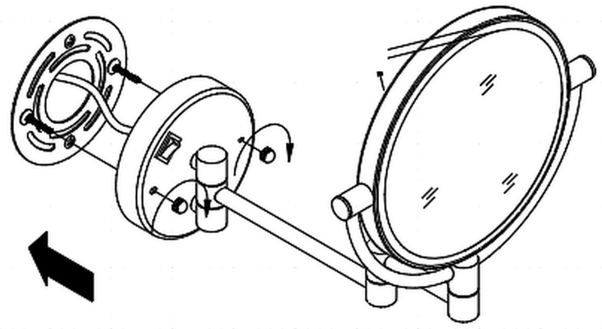

03 Connect the supply wires

Isolate the power supply before making connections.

A qualified electrician must connect L, N and earth.

04 Attach and lock the mirror

Engage the mirror body with the mounted back plate.

Tighten the retaining nut and check the fit is secure.

IMPORTANT - INSTALLATION SAFETY

Reference illustration only. Confirm fixing centers, anchors, drill size and power rating against the actual product before drilling.

Disconnect power before wiring. All electrical connections must be made and checked by a qualified electrician to local codes.
