Wall-Mounted LED Makeup Mirror

Hardwired LED mounting - standard installation reference

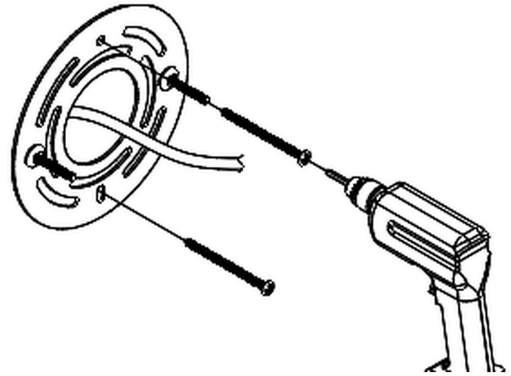

01 Mark and drill the mounting holes

Mark two hole centers 90 mm apart, as shown.

Drill 2 x 8 mm diameter holes and prepare the cable outlet.

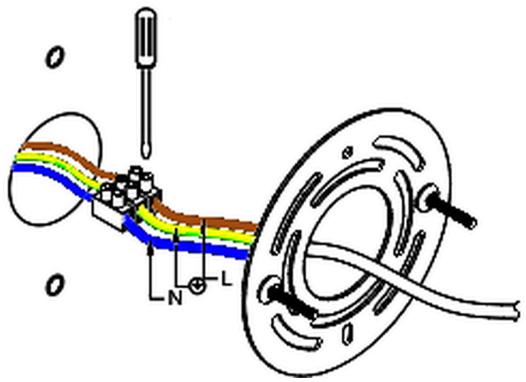

02 Secure the mounting chassis

Install suitable anchors and fasten the chassis to the wall.

Route the supply cable through its central opening.

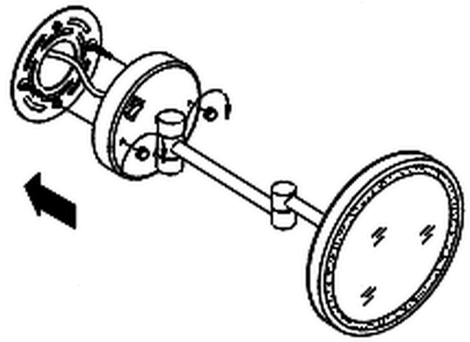

03 Connect the supply wires

Disconnect power. Connect L, N and earth as marked.

A qualified electrician must make and check all connections.

04 Attach and lock the mirror

Engage the mirror body with the fixed mounting chassis.

Tighten the retaining nut and check for secure attachment.

IMPORTANT - INSTALLATION SAFETY

Use these drawings as a reference. Confirm hole spacing, anchors, drill size and product power rating against the supplied unit.

Disconnect the power before wiring. Electrical work must be performed by a qualified electrician in compliance with local codes.
