Split-Type Bathroom Mirror Installation Guide

Remove mirror | Fix chassis to wall | Connect wiring | Hang mirror | Test power

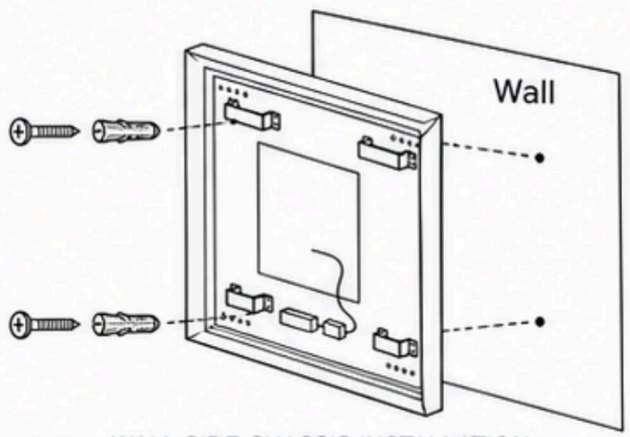

01 Lift mirror off the chassis

REMOVE MIRROR FROM BACK CHASSIS

Open the carton and lift the mirror upward carefully to remove it from the split chassis.

02 Fix metal chassis to the wall

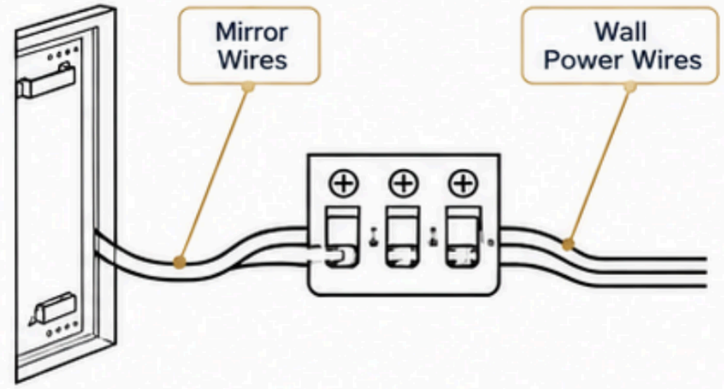

WALL-SIDE CHASSIS INSTALLATION

Attach the metal chassis to the wall using the supplied screws and plastic anchors. Check level before tightening.

03 Connect wires properly

POWER OFF BEFORE WIRING

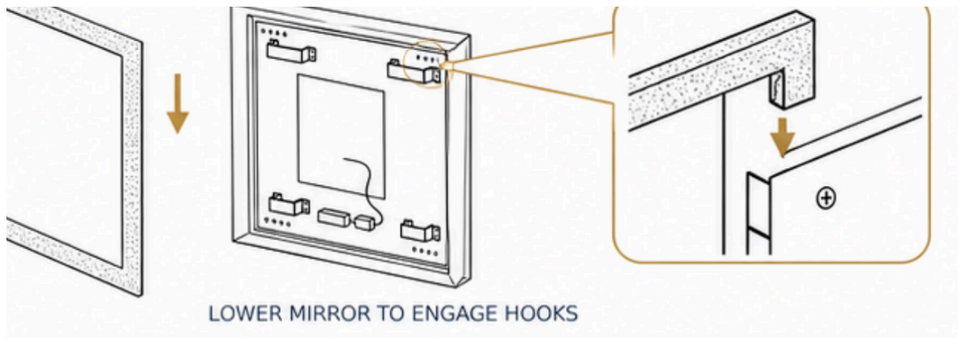

CONNECT TO POWER SUPPLY

Switch OFF and isolate the supply before wiring.

Connect per the product diagram and local code; use a qualified electrician.

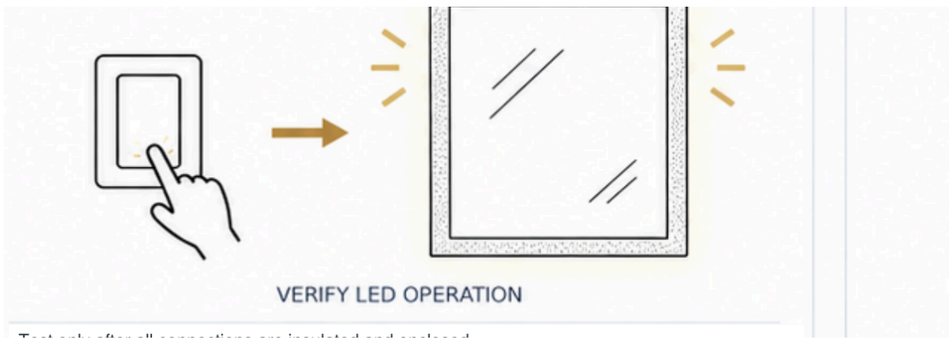

04 Hang mirror onto chassis

LOWER MIRROR TO ENGAGE HOOKS

With power OFF, lower the mirror onto all chassis hooks. Check that every hook is fully engaged.

05 Restore power and test

VERIFY LED OPERATION

After the mirror is securely installed, restore power and verify LED operation.

INSTALLATION NOTES | NOT A DRILLING TEMPLATE

Use appropriate wall fixings. Isolate power before wiring and hanging; follow the product diagram and local electrical regulations.
