Square Wall-Mounted Makeup Mirror

Hardwired connection - wall mounting bracket

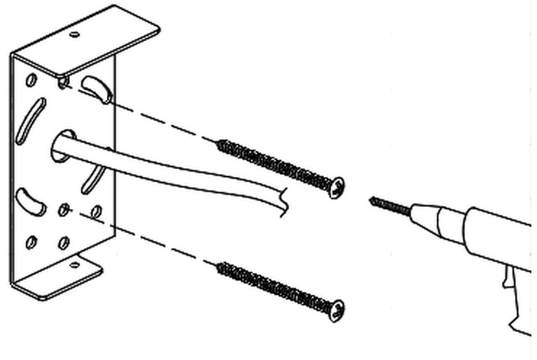

01 Prepare the mounting holes

Mark the fixing points as indicated in the drawing.

Prepare the cable outlet and holes for suitable wall anchors.

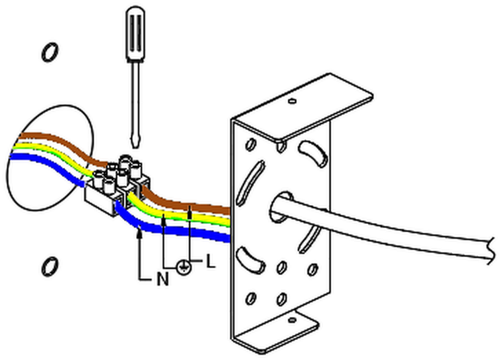

02 Secure the wall bracket

Feed the cable through the opening in the bracket.

Fasten the metal bracket with suitable anchors and screws.

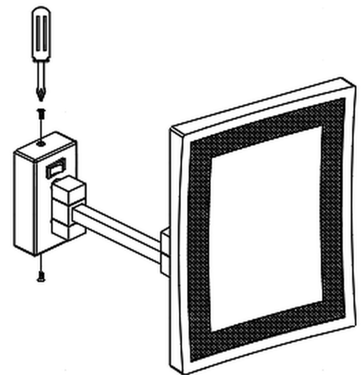

03 Connect the supply wires

Disconnect and verify the power is off before wiring.

A qualified electrician must connect L, N and earth.

04 Attach and secure the mirror

Position the mirror arm onto the installed bracket.

Tighten the fixing screws using the appropriate Allen key.

IMPORTANT - INSTALLATION SAFETY

The source drawing marks fixing spacing as 57.5 without units. Verify units, hole spacing, anchors and product specifications before drilling.

Disconnect the power before wiring. All electrical connections must be made and checked by a qualified electrician to local codes.
