Square Wall-Mounted Plug-in Makeup Mirror

Plug-in power - wall mounting plate

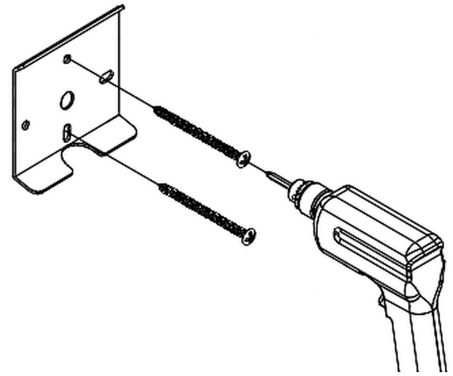

01 Mark and drill the holes

Mark two fixing points as shown in the drawing.

Drill holes and fit anchors suitable for the wall.

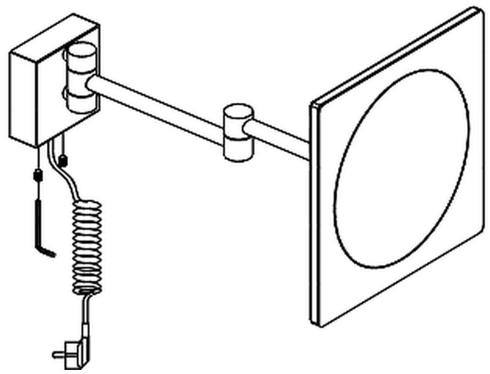

02 Fix the mounting plate

Position the mounting plate against the wall.

Secure the base with suitable screws and anchors.

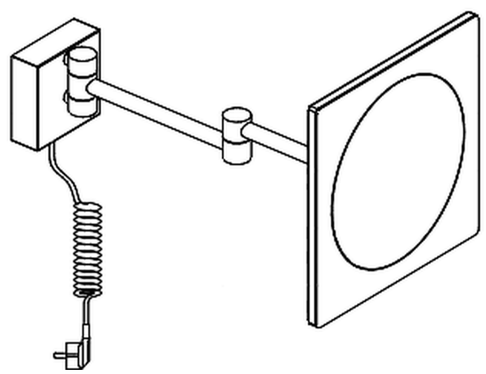

03 Secure the mirror assembly

Align the mirror cover with the mounted base.

Fasten the cover and mounting base together.

04 Complete the installation

Check that the mirror and arm are firmly secured.

Connect the plug to a suitable outlet for use.

IMPORTANT - PLUG-IN INSTALLATION

The source drawing indicates fixing spacing of 42 without units. Verify the units, wall anchors and hole positions before drilling.

Plug-in type: do not hardwire. Use a compatible outlet, keep the plug accessible, and route the cable away from water and sharp edges.
